Welcome to the world of Scanahand!

Because this is the first time you are printing an empty template, this instruction page is printed aswell. If you need a new instruction page later, you can print it through the "File" menu.

Step 1 - Filling in the template

Make sure you fill in the template the proper way:

<input checked="" type="checkbox"/> A	<input checked="" type="checkbox"/> a	<input checked="" type="checkbox"/> e	<input checked="" type="checkbox"/> f	<input checked="" type="checkbox"/> g	<input checked="" type="checkbox"/> s	<input checked="" type="checkbox"/> 8	cap height x-height baseline descender
A	a	e	f	g	s	8	
<input type="checkbox"/> A	<input type="checkbox"/> a	<input type="checkbox"/> e	<input type="checkbox"/> f	<input type="checkbox"/> g	<input type="checkbox"/> s	<input type="checkbox"/> 8	
A	a	e	f	g	s	8	

You can use a guidelines underlay to help you write the characters at the right position. To print a guideline underlay for the selected template, choose "File->Print guideline underlay"

Step 2 - Scan the template

After you have filled in the template, place the first page as straight as possible onto the scanner bed and click the "Scan" Button. If your scanner has an auto-feeder we recommend not to use it.

Step 3 - Generating the font

Finally, press the "Generate..." button, fill in your font name, wait, and enjoy your font!
